The 1976 Chevrolet Truck was placed out of service permanently due to mechanical issues during January of 2006.

The 1981 Chevrolet Donated by the Falmouth Fire Department was placed in service during May but the engine seized during a run to Wellesley in September and the cost of repairs to this vehicle was deemed too excessive due to its age.

We were fortunate to receive a donation of the 1992 Ford E350 from Chief Gerald Reardon and the Cambridge Fire Department, which was placed in service on January 11, 2007.
